# MINI MASTERS

## Stop Motion Animation

Kids Program

◆◆◆

11.00am - 4.00pm, Saturday 16 July

Stop motion is a fun and popular animation technique involving numerous photographs of characters and objects stitched together to form a short story. Kids will learn how to create a stop motion animation using introductory level multimedia techniques in a three-stage production process.

Kids will develop their story through brainstorming, scripting and storyboarding using familiar tales, then discover the technical side of stop-motion animation by learning how to create characters and backgrounds. Finally, use iPads and apps to build a short animated film complete with figures, backgrounds, found objects, lighting, staging, sound and editing.

**GROUP SIZE:** 10 participants

**WHAT'S SUPPLIED:** Light refreshments, iPads, backdrops, lights, some basic materials including plasticine, drawing materials and craft items.

**WHAT TO BRING:** Lunch, a story, miniature figures and objects smaller than 5cm high including Lego, toys, natural materials, jewellery, craft items. If preferred, also bring your personal iPad with iMovie and iMotion apps installed.

**\$50 OR \$30 FOR MEMBERS**

**Bookings and payment due by Monday 11 July**
